

AMENDMENT

IN THE ABSTRACT:

Please replace the abstract with the paragraph below:

A fluid connection assembly for connection to a fluid supply member that extends through a panel from a rear to a front surface of the panel includes a connection member that is engageable with the fluid supply member at the front surface of the panel. A connector is operable from in front of the panel to connect the fluid supply member to the outlet member in a fluid-tight manner. The connection member may be a shower outlet elbow for connect of a shower hose.
